## Importing Gulp-sass

**Problem:** If you are using the current version of nodejs, then you may get an issue in importing gulp-sass.

**How to fix:**

```
//follow below syntax for importing gulp
const sass = require('gulp-sass')(require('node-sass'));

//final code for css is this.
gulp.task('css', (done) => {
  console.log('Minifying CSS');
  gulp.src('../assets/sass/**/*.scss')
    .pipe(sass())
    .pipe(cssnano())
    .pipe(gulp.dest('../assets.css'));

  console.log('Minified CSS');
  gulp.src('../assets/**/*.css')
    .pipe(rev())
    .pipe(gulp.dest('../public/assets'))
    .pipe(rev.manifest({
      cwd: 'public',
      merge: true
    })).pipe(
      gulp.dest('../public/assets')
    );
  done();
})
```
